

```
#include <stdio.h>

typedef struct {
    float pReal, pImag;
} Complex;

Complex preenche(float r, float i) {
    Complex tmp = {r, i};
    return tmp;
}

int main() {
    Complex num;
    num = preenche(2.5, 3.5);
    return 0;
}
```
